

Farm to plate

SLO: Students will understand what happens to King salmon when they are harvested and where they go once they leave the farm.

INTRODUCTION:

King Salmon is grown in sea farms in the Marlborough Sounds. The fish are harvested year-round so that people in New Zealand and right around the world can eat and enjoy our wonderful Marlborough King salmon 365 days a year.

WHAT YOU WILL NEED:

- King salmon Farm to plate activity sheet – 1 per student
- Hatchery Process poster
- Sea Farm Process poster
- Primary Salmon Process poster

ONLINE VERSION:

kingsalmon.co.nz/ed/activity15

ACTIVITY:

Students show each of the stages of King salmon production – harvesting, producing, buying, cooking and eating King salmon – through pictures.

INFORMATION SHEET

Farm to plate

King salmon is grown by The New Zealand King Salmon Company in sea farms in the Marlborough Sounds. The fish are harvested year-round so that people in New Zealand and right around the world can eat and enjoy our wonderful Marlborough salmon 365 days a year.

Once grown to full size, harvested King salmon are taken by tanker to the processing factory, where they are processed and packaged for distribution by truck and aeroplane to supermarkets and restaurants in New Zealand and overseas.

In New Zealand supermarkets, King salmon from The New Zealand King Salmon Company is sold under the Regal and Southern Ocean brand names. Our salmon ends up on dining tables throughout New Zealand and in restaurants in Australia, Japan and the United States.

For research and ideas view the posters and visit the following websites:
