

Seabird Incident Report

Through responsible management and best practice operations, we strive to farm our King salmon in harmony with the natural environment and with minimal negative impacts on local wildlife.

Seabirds naturally gravitate towards farm structures as a perching ground and source of food, although we endeavor to prevent fatalities, they unfortunately can occur.

All fatal seabird incidents are updated to our corporate website within 30 days of the occurrence.

Date	Sea Farm	Bird Type	No. of Birds	Conservation Status
11/01/19	Waihinau	Southern black backed gull	1	Not threatened
